SIMULATE PATIENT BREATHING
The QUASAR™ Respiratory Motion Phantom is a programmable state-of-the-art breathing simulator for conducting quality assurance testing on radiotherapy systems. Using a personal computer to communicate with the QUASAR™ Respiratory Motion Phantom, the software application downloads patient respiratory waveforms to the phantom, simulating the breathing function.

KEY FEATURES
- Operate the phantom directly from a PC or laptop
- Stream patient-specific respiratory motion waveforms
- Interchangeable inserts for multiple testing applications
- Works with a number of motion tracking systems
- Includes an unlimited multiple site software license

BENEFITS
- Communicate with phantom through local area network
- Requires no additional programming or customization
- Ability to rotate inserts as they translate to create 3D motion
- Compatible with VXP, .CSV, .TXT, .DCM, .LOG, .DAF, .IMA
- Install the software on an unlimited number of computers

Used for regularly scheduled testing, as well as commissioning new systems and upgrades, and testing repairs, the Respiratory Motion Phantom is designed to move cylindrical inserts in the superior/inferior direction within a body shaped oval with both varying speed and amplitude. Several different moving inserts are available for a variety of applications. Insert motion is linked to a moving Chest Wall Platform designed to carry a respiratory tracking device.

The QUASAR™ Respiratory Motion Phantom is designed to work with different therapy delivery systems and is compatible with kV and MV CT imagers.

PATIENT-SPECIFIC SOFTWARE
Included with the phantom is the QUASAR™ Respiratory Motion QA Software application which allows you to import, create, edit and save respiratory waveforms. Easily import patient-specific waveforms from a number of respiratory gating machines including Varian Real-time Position Management™ (RPM), Anzai, Cyberknife, Philips, Respisens, and Siemens. Quickly create custom waveforms or import unique waveforms produced using tab delimited spreadsheet files.

Above: Phantom Control Module
Conveniently edit waveforms using a wide range of functions include adjusting the amplitude, stretching or compressing the timeline and filtering out high frequency noise, low frequency drift and cardiac signals.

The software is compatible with Windows 7 or better.

**MINIMUM TECHNICAL REQUIREMENTS**
- **Operating System:** Windows 7 SP1, 8.1 or 10
- **Ports:** 1 Ethernet

**SPECIFICATIONS**
- 7 kg Acrylic Body Oval: 30 cm W x 20 cm H x 12 cm L
- 5 kg Drive Unit: 20 cm L x 15 cm W x 12 cm H
- Total weight is approximately 20 kg with all options
- 2 openings in body oval: 8 cm diameter each, for drive unit and moving insert
- Includes cedar insert: drilled for 2 cm diameter acrylic ion chamber holder
- Chest wall platform: 13 cm diameter, carries up to 500 g
- Power supply: Input, 100 – 240 V AC, 47 – 63 Hz
- Output, 24 V DC 2.1 A, 50 W.
- Approvals: CE, UL/CSCA 60950-1

**ORDERING INFORMATION**
- 100-1011 QUASAR™ Respiratory Motion Phantom
  - 1-Software License
  - 1-Phantom
  - User’s guide

**OPTIONAL ACCESSORIES**
- 500-3330 Rotation Stage for 3D motion
- 500-2003 Phantom Heavy-Duty Shipping Case 8 kg

**OPTIONAL INSERTS**
- 500-3305 Acrylic Insert
- 500-3311 Cedar Insert with Solid Tumour
- 500-3312 Cedar Insert with Solid Tumour – Drilled
- 500-3313 Cedar Lung Tumour Insert (Split)
- 500-3314 Hollow Insert with Screw Cap
- 500-3315 Film Cassette Insert
- 500-3317 4D CT Imaging Insert
- 500-3318 PET/CT Insert
- 500-3322 MP Insert Adapter
- 500-3331 Offset Cedar Insert with Solid Tumour
- 500-3332 Offset Cedar Insert with Solid Tumour - Drilled
- 500-3333 Offset Cedar Lung Tumour Insert (Split)
- 500-3395 Cedar Ion Chamber Holder
